## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed 3/6/06 have been fully considered but they are not persuasive.

Re Claim 1, applicant argues that Jalali does not teach multiplexing a usage of each cluster. Examiner disagrees. Fig. 3 teaches a combiner for multiplexing a usage of sub-channel cluster of fig. 2. In particular, applicant argues that the time-slot scheme for an OFDM used the pilot data for synchronization and not cluster usage. However, as fig. 2 also teaches, sub channel clusters for multiplexing user data and each associated with a time slot. Hence, multiplexing a usage of each cluster is disclosed.

### ***Allowable Subject Matter***

2. Claim 32 is allowed.

Claims 2-4, 6-11, 13-31 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

In combination with claim 1 and 6, prior art fails to teach assigning each cluster based on the probability that the cluster will be used by the subscribers.

### ***Conclusion***

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
